Tough Going

2009 is shaping up as a difficult year for many businesses as the global recession bites. One thing that does not help is the continual bombardment of projected gloom from all quarters as many organisations try to get gain from publishing negative economic news. **TJ-Steel** believes we have hit ground zero and are starting to rebound as there are many positive things happening that do not get a mention.

Galvanized Pipe

TJ-Steel has been fortunate to gain the New Zealand agency for galvanized pipe from a new Thailand Mill: Mitr Steel Co Ltd is a

new established pipe mill located in the Rayong area which is 180km south east of Bangkok. **TJ-Steel** has purchased black pipe from

this mill for some time and it is only now that the galvanizing facility has been added and can now coat pipe with zinc up to 7 meters long. BS1387 is the standard and in a size range from 15mm nominal bore up to 200mm nominal bore in light, medium and heavy wall thicknesses, sizes which are well known to the industry.

The first trial shipment of galvanized pipe has been ordered and will be arriving from this mill shortly so if our preparation and research are anything to go by then we should be able to offer the industry high quality, well priced pipe.

Large Diameter Galvanized Pipe—**TJ-Steel** has good stocks of 200mm NB Galvanized just phone for price and availability.

Pipe Swaging Facilities

We are about to receive our pipe swager that reduces the outside diameter of pipe in sizes 25mm, 32mm, 40mm and 50mm nominal bore that allows the pipe end to telescope into the same size. Benefits in ease of joining pipe using this system are numerous. Simply phone TJ-Steel for more information.

Orrcon Steel

For the past 10 years **TJ-Steel** has enjoyed an excellent working relationship with Orrcon and has assisted them with new product promotions that established new niche markets for their products. In the middle of 2008 the demand for steel internationally was so intense that Orrcon were struggling to meet the requirements of their Australian customers therefore made a decision to delete New Zealand from their market and close their Auckland storage and distribution facility. Once the impact of this decision was digested, **TJ-Steel** did not dwell on the past and have had excellent support from Asian and Australian mills to the extent we can service the Hollows market better than previous. Oh, how the steel demand situation changed in such a short time, we are sure there will be many interesting decisions as manufacturers and suppliers navigate through the turbulent change.

National FieldDays 2009

FieldDays 2009 what is in store this year? **TJ-Steel** along with other members of the Forlong and Maisey Group, HMF Mowers, Industrial Wheels, and Instrument Supplies will be promoting their products on site. **TJ-Steel** will have people on Site to answer any steel related questions. **Site No G 60**

"Steel in Wheels"—Phillip Birchler the General Manager of Industrial Wheels Limited with some steel rims that are one of the many types manufactured in their factory based in Te Rapa.

Greg Prosser, the General Manager of **HMF Mowers** with the ever popular Wildcat Savannah mowers being assembled at their factory in Vickery Street, Hamilton, **TJ-Steel** enjoys working together with the people at HMF Engineering as they develop new products.

Ron's Reinforcing

Want to save money in take offs and detailing? Then the industry is well catered for as Ron Christian is the answer. All you have to do is pay for what is taken off, detailed to match drawing requirements at better than competitive prices.

Living up to an "Icon" status is not easy for Ron, however he is well supported by his experience of 35 years while searching for detail in all type of contracts and many type of plan styles as no two sets of plans are the same.

Ron is located at Level 2 **TJ-Steel** Building 40 Bryant RD Hamilton.
Contact Ron on 07 849 0974 or 021 158 6978

TJ-People

Colin Leabourn who is well known as our friendly driver when delivering steel around the northern region has recently become a proud grandfather to a healthy baby boy named Lakai.

Roger Sheridan has had a short time in hospital following the removal of his appendix and will be back to normal as soon as possible providing his usual high standard of service to our Southern Region.

Deliveries

TJ-Steel are searching for ways to improve our delivery service, any ideas would be welcome and should be communicated to Scott or any of our sales team.
